

YOLO COUNTY DEMOCRAT.

SATURDAY, JANUARY 4, 1889.

FIRE PROSPECT.—The Vallejo Recorder thus cheerfully speaks of the prospect ahead for the reclamation of swamp land in this state:

At a recent meeting of the California Academy of Sciences, Dr. Gibbons made some remarks on the bad policy of burning over the tules. He said when burnt off, the deposit of ash was scarcely perceptible, nearly the entire substance being dissipated; but when the vegetation was suffered to fall into natural decay, the annual increase in depth of soil would be very important, for carrying on the business. At this rate about two feet in a century would be gained. Such a yearly increase would soon effectually reclaim all the tule land in the State, and render it valuable for cultivation.

According to the above data it would only require a period of four hundred years to raise the tule lands to the height of eight feet, which is about the average depth of water now standing on thousands of acres. A long time to wait! And as the relative position of this high grade and the beds of rivers—as they will stand at the expiration of that time—is not reckoned in this nice little calculation, we don't want any stock in the undertaking.

The following delectable piece of information is gratuitously contributed to a very small portion of the reading public by the Solano Herald, whose editor is much noted for his learned (?) judgment on abstruse questions, as he is in his capacity for finding mare's nests:

The United States Grand Jury, in San Francisco, recently presented indictments against the following persons: Octave Lamarche and Frederick Dahman, for making false returns of income; John M. Flammberg and John Bernard, alias Z. H. Vannab, for assault with a dangerous weapon; Henry Westling, for carrying on the business of a distiller without paying the special tax. The fact is noteworthy that none of these names are American; and we'll wager our old hat that they are all Democrats, opposed to Sunday laws, anti-liquor laws, and every other law restraining the vicious from the free exercise of their evil propensities.

We would take the wagger and present the warning to our devil, but he would scorn to wear the old title, unless it could be rid of the scent of such radicalism as the above paragraph so aptly illustrates.

TUNE CHANGED.—It is quite amusing to observe the changing key-notes of political weather-cocks about this time. A number of rampant shriekers for blood have lately "simmered down" and are now drawing it excessively mild. One of these birds, who is now feeding at the public crib by permission of the party which he was wont to berate, is thus spoken of by the Chico Courier:

M. D. Boruck, editor of the Spirit of the Times, ex-Clerk of the Assembly, and present Assistant Clerk at the desk of that Democratic body, writes very mild and honeyed letters to his paper, in which not a trait of the person who swung the bloody meat ax before the election can be seen. Looking through official eyes, he sees no Copperheads, but very fine gentlemen before him. The war and bloodshed he prophesied upon the success of the Democratic ticket, has turned out to be "bread-and-butter," and he receives his daily allowance of pap, instead of cold lead and steel, and becomes eloquent in praise of everything Democratic. What a change a little office will produce sometimes.

NEWSPAPER ENTERPRISE.—The commendable spirit of enterprise displayed by the publishers of the Sacramento Union, in providing interesting news items for their readers, is a noteworthy fact. The issue, of January 1st, comes to us laden with a complete record of the important events of 1887, arranged chronologically, and suited as a valuable reference, which can be appreciated by the reading public. We consider that issue fully worth the price of a year's subscription.

MURDERERS IN THE RAB.—The Mining Press speaks of a singular instance of mushroom growth in the human sex. The Green Valley National adds: It is not uncommon for a cabbage to grow on a human neck, but as a general thing it does not make a solid head.

We have seen corn growing in the ear and have heard of its being bagged; but in regard to the other part of the story, we presume the National intended to say it was not uncommon for cabbage to grow on the neck of a horse.

SANTA CLARA SENATOR.—The Republicans of Santa Clara County, (says the Call), have nominated James P. Sargent, and the Democrats, Charles Macley, for the State Senate, in place of Mr. Knox, deceased. Mr. Macley is an old citizen of that county, who formerly partly represented it in the Legislature with credit, and his election is an event to be desired. Mr. Sargent is a gentleman but little known outside of his own county. There appears to be no doubt of the final success of Mr. Macley, who, as a man and citizen, has a character above reproach.

FAVORITE.—The following letter was received by General Washburne during the war, from a disinterested patriot down in Maine, which reminds us of "a little anecdote":

Mr. Gov. Washburne, sir I feel as thou I had ought to be doing something for my country, and have you a candle place for me I should like to have it if you can write me and give me instructions what you want me to do. Yours truly,

A DISHONEST PAYER.—The London Spectator, which has been conducted for six years past on the pleasing theory that the Republican party in America was "the noblest party ever formed," has just given up the main part of the business. It solemnly declares its unwilling conviction that "Honest Greely is the only honest man now left in the Republican ranks."

JUDGE TURNER.—The Solano Herald, in speaking of the proposed impeachment of Judge Turner, pettishly makes the following inquiry:

Won't it be something new under the sun if a Democratic Assembly shall seriously bring charges of drunkenness against an officer, thus pronouncing it an impeachable offense?

It is plain that the interrogator is in search of political capital. He has no opinion of his own to express, but possessing a brain which constitutes him a natural growler, seeks an opportunity in speculating on the conduct of others, to display his aptitude in his profession; and no matter how the question at issue may be decided, he must have his growl, for in his narrow view of the chances of things it would be a sin for him to concur in the action of any assembly which contained a Democratic majority. When that question comes up before the Legislature, we believe the intelligent representatives constituting that body will calmly and dispassionately weigh all the testimony and render their decision in accordance with the facts, and with the view of promoting the interests of the people residing in the Judge's District, (as well as the State at large), who can but feel a deep solicitude in the settlement of a question which involves the moral standing of the entire community.

If the charges against Turner be proven, his impeachment should follow. It is time this course of fashionable drunkenness in official circles should be rebuked. No man should be allowed to retain an office of honor whose habits of intoxication and consequent neglect of duty does violence to the feelings and interests of a confiding people to whom he is indebted for his position. No man, in any position, has the right to set before the youth of the country an example of debauchery and drunkenness, and he that does so deserves to be regarded as an enemy of mankind. The accused, will be tried by fair-minded men, and if innocent, he will be honorably acquitted; but should his guilt be established, he will doubtless be dealt with in accordance with the demands of public decency and the honor of the State.

WHAT AND CHES.—It appears to be a pretty well established fact that under certain circumstances wheat will turn into chess. This is a question which has long claimed the attention of farmers; a great majority of whom have never arrived at any definite conclusion in regard to it. The finest lands in our agricultural districts, after having been sown down in the best quality of seed wheat, oftentimes present a discouraging harvest in consequence of the presence of worthless chess in large quantities. The knowledge of the cause, and the ability to remedy this evil, would be a valuable acquisition to the practical farmer. It is claimed by some who have given attention to the matter, that the condition of the ground at seeding time governs the harvest in this respect almost entirely. If it be true, as has been frequently suggested, that soil very wet at seeding time will produce chess in wheat, the evil could easily be prevented by planting only at such times when the earth retained just sufficient moisture to admit of its being worked. We imagine, however, there are many other causes which effect the production of chess which will some day become known to careful experimentalists. Would it not be well, in the meantime, for some of our Yolo farmers to test the "wet soil" theory? The condition of the ground at present presents a favorable opportunity for an experiment in that direction.

HORRIBLE SUICIDE OF AN ARMY OFFICER.—We copy the following account of the death of Lieutenant Colonel Edward McGarry—another victim to the consequences of the immoderate use of strong drink—from the Daily Examiner of December 31st:

This community was thrown into a terrible state of excitement this morning, it having been reported on the streets that an Officer of the Regular Army, holding high rank, had cut his own throat from ear to ear. Started at an announcement so sudden and horrible, the reporter at once started out to obtain the facts of the case, which are as follows: Lieutenant Colonel Edward McGarry was found dead at an early hour this morning lying on the floor of his room in the Occidental Hotel, with a knife in his blood, his throat cut and an open knife by his side. Deceased had been drinking very hard of late. Last night he manifested symptoms of mania-a-poti, and the Hotel folks endeavored to confine him to his room. About eleven o'clock he told the servant to clear out, locked the door, and was found this morning in the condition stated. Deceased was a native of New York, about forty-five years of age. Formerly he was an Assemblyman, from Napa county, and subsequently a Senator from Napa, Solano, and Yolo. When the late war broke out, he assisted in raising the Second Regiment of Cavalry California Volunteers, of which he was appointed Lieutenant Colonel, and was afterwards Colonel. This regiment did duty on this coast. The war ended, he was appointed Lieutenant Colonel of the Thirty-Second Regiment of Infantry, Regular Army—one of the newly organized regiments—which rank he held at the time of his death, with the additional one, if we mistake not, of Major. He was a good-hearted man, and universally respected.

THE Dramatic Chronicle proposes to publish, in a "black list," the names of those persons who are caught in the act of disturbing an audience and insulting the performers by audible conversation, humming or whistling the music, or trying to keep time with their feet. [Ex.] A good idea. This is a species of moral disorder which incurs no penalty in law, but which sometimes deserves the severest reprimand. We have been present at several performances hereabouts, where the conduct of some persons fully entitled them to have their names enrolled on a list of the same kind.

When young women blush and weep, and they be said to raise a hue and cry? [Ex.] Certainly; but the rainbows (bow) comes after the waterfalls.

For the "Democrat."

Shall We Have a Railroad?

EDITOR DEMOCRAT.—Sir:—The propositions of several companies who have asked the people of Yolo county to take stock to the amount of from one to two hundred thousand dollars in railroads, marked out by surveys, have frequently been discussed by those who are interested in the welfare of the county. So far, our county has refrained from taking any railroad stock, and wisely too, as from appearances, the object of those companies has been a matter of mere speculation. But, situated as we now are, being shut out from all the world by reason of high water, it certainly is high time for the high and low of our property here, and who feel an interest in the prosperity of the county, to look, think and act in reference to some means of travel during that portion of the year in which, as at present, we are mud and water bound. This, of course, does not apply to that portion of the county in the vicinity of Knight's Landing, where the interruption of communication is not so seriously felt. But even at that point, to and from which boats are running only once or twice a week, there are no advantages for shipping and travel sufficient to meet the wants of the county. We want a railroad. We are within seven and a half miles of the Sacramento river, where boats run daily to and from Sacramento city. The tule is scarcely one mile wide, and here the ground is firm and of easy grade, where grade is necessary. Trestle-work, say three-fourths of a mile, or possibly one mile in length, would be required, which would constitute the only expensive part of the road. Now, this route from Woodland east to the Sacramento river is practicable, or within our reach. The road can be built by internal enterprise—by the citizens of Yolo county, the value of whose real estate would thereby be increased one-half. Again, the road would pay the farmers would find a market for their grain at Woodland, which is easier of access for two-thirds of the county than any other point of shipment. The completion of the road would open a route of travel at all times of the year—a daily communication with Sacramento city, San Francisco and Marysville. The county would evidently find it to its advantage to repair their mountain roads and take the cars at Woodland for Sacramento, Virginia, Salt Lake or New York city. G. W.

USELESSNESS OF LEVEES.—Under the heading, the Call, of the 28th ult., makes the following sensible remarks:

Frequent floods—and especially those of 1861-2 and 1867—have demonstrated the folly of attempting to carry out any general system of levees on the Sacramento, San Joaquin, and other rivers subject to overflow. Levees may serve to protect occasional and exceptional localities from floods, as, say, in the case of Sacramento and perhaps Marysville, but they cannot be made to protect from overflow the territory lying along the banks of our principal rivers, especially those coming from the mining regions. The fact is, it is impossible, with anything like the financial and physical means at the command of the people of this State, to build levees high and strong enough to confine to their regular channels the waters which are liable to pour from the mountains in the winter season. Some six years ago we called attention to a fact in this connection, which subsequent experience and observation have served to render more apparent; and that is, the beds of the rivers leading from mining regions are rising up so fast—owing to the continued deposits of earth coming from the mountains—that it is a physical impossibility to raise levees fast enough to counteract the effect. The channel of the Sacramento river to-day, for instance, will not hold much more than half as much water as it would in 1850. Consequently, two-thirds the fall of rain which was experienced in 1849 will flood the country now to a greater extent than it was flooded in that year. Those who have noticed the great masses of earth annually sent from the mountains during the past seventeen years find it enough to counteract the effect. The channel of the Sacramento river to-day, for instance, will not hold much more than half as much water as it would in 1850. Consequently, two-thirds the fall of rain which was experienced in 1849 will flood the country now to a greater extent than it was flooded in that year. Those who have noticed the great masses of earth annually sent from the mountains during the past seventeen years find it enough to counteract the effect. The channel of the Sacramento river to-day, for instance, will not hold much more than half as much water as it would in 1850. YOLO COUNTY DEMOCRAT.

County Official Paper.

TOWN AND COUNTY MATTERS.

NEW YEAR'S EVE BALL.—The Ball given at Baker's Hotel, by A. S. House, on New Year's eve was notwithstanding the bad weather, very well attended and proved in every respect a complete success. The dancing commenced at an early hour and was kept up until daylight. The music, by French's band, consisted of good selections well performed. The supper was all that could be desired, and everything passed off to the entire satisfaction of the gay participants. Our reporter, a very modest young man, was prevailed upon to accept a complimentary ticket. He returned next morning so much excited that he was unable to give any account of his observations, except a confused statement about "fine orchestra music, musical voices, gorgeous crinolines," etc. On being reconstructed, he says they had a good House, and that he saw one of the proprietors of the DEMOCRAT seated at the supper table, in front of a fat roast turkey, acting in the capacity of a "reception committee."

A FRIGHTENED RELATIVE.—A correspondent writing from Berkeley, in this county, says of the late storm: "On Sunday morning last, about day-break, commenced the grandest storm of the season. The rain fell in such torrents that it surprised the oldest citizens. About 10 o'clock a. m. a furious south-east wind sprang up, when such a storm ensued as we have never before witnessed. Our houses, which we had considered water-proof, leaked like riddles; gum coats were in demand, while rubber suits 'out and out' were consulted. Soon the mountain rivulets became gigantic and rushed madly down upon us; our green fields were covered with rolling waves; everything presented a subaqueous aspect, while our population began to think seriously of approaching dissolution. One blacksmith shop was blown away, a breach made in the port of a saloon, trees blown down, vines thoroughly riddled, and *cousin Mary* was nearly scared to death!"

MORE "ELATION."—Parties on their way to and from the Ball and other places of amusement on New Year's eve, had rather a gay time in the rain and mud. Regions hitherto unexplored were accurately mapped out in mud and water colors, on broad cloth, rivaling our devil's executions with printer's ink. The rain fell during the whole night, but there was no downward tendency to the flow of spirits until about day-break, when several amusing mistakes occurred among those who sought their partners to return home. A merchant lost his "tie," and while endeavoring to borrow another he lost his partner and was obliged to return home alone. He stood the joke, Frankly confessing that he was sold.

COMMUNICATION WITH SACRAMENTO.—The line of boats which did good service on the river last year, has been re-established by the proprietors, Conrad & Rawlings, who are experienced and careful boatmen and prompt in attention to all orders entrusted to their care. They leave Washington, carrying the U. S. Mail, every Tuesday, Thursday and Saturday; returning, connect with Tucker & Buckley's stages, which leave Woodland every Monday, Wednesday and Friday.

STAMPER TULARE.—This fine boat is now making regular trips from Sacramento to Knight's Landing and Colusa. S. W. Raverly, the accommodating agent, at the Landing, is prepared at all times to receive freight and secure passage for those who desire to ship or travel by this route. John O'Keefe's line of stages connect regularly with the boat, and all orders sent by him will be promptly attended to.

The farmers on the river and in the low lands immediately west of the tule have suffered great loss in crops, improvements, stock, etc., in consequence of the overflow. One month ago hundreds of acres of this land, now inundated, presented as fine a prospect for a good crop of wheat as was ever seen; now all is completely lost.

SUDDEN DEATH.—We learn with regret that the wife of our friend W. M. DeWitt, died suddenly on last Wednesday morning, at Grand Island, Colusa county. She was a most estimable lady, whose courteous bearing and cheerful disposition drew around her many warm friends who will be pained to hear the sad news.

THE FLOOD.—We learn that one day this week the water stood within four inches of the top of the counter in the Tule House. It extends from the river, westward, to a point within three miles of Woodland, from whence boats make daily trips to the Sacramento bridge.

I. O. O. F. ELECTION.—Woodland Lodge, No. 111, on last Saturday evening elected these persons as officers for the ensuing term: A. J. Hall, N. G.; Adam Stiner, V. G.; D. M. Burns, R. S.; G. J. Overshiner, T. Installation this evening, by J. S. Friend, D. D. G. M.

FLEISHMAN & KAUFMAN.—This firm, finding it necessary to make more room for their large stock of goods, have rented the fine store in the east end of Elliott's block, which they intend to use in connection with their own.

CLARK CREEK has been over its banks again in the vicinity of Cacherville. On the south side of the creek, near the bridge, the water was from two to four feet deep, yesterday, and still rising. So says our informant.

SOCIAL PARTY.—Prof. French will give a social party at the Hotel in Cacherville on the evening of the 8th inst. Tickets, including supper, \$3. Turn out, and do honor to the memory of "Old Hickory" at the battle of New Orleans.

NOCO-BO.—We are under obligations to our friend Tucker for a capacious mug of excellent egg-nogg, on New Year's day. While his hens lay on, his cow gives down and his nutmegs come up, may he never Tucker out.

DON'T FORGET.—Farmers and others visiting Sacramento, should not fail to call at the store on the south-east corner of 3rd and J streets, and examine the fine stock of gentlemen's furnishings kept by B. Alexander.

DETAINED.—Letters addressed as follows, are detained in the post office at this place for postage: J. G. Doll, Red Bluffs, Wm. L. Smith, "Mine's Foundry."

RECOVERING.—Miss Pennington, the lady who had a limb amputated at the ankle, about three weeks since, we are pleased to learn is rapidly recovering.

NUMBER 144.—Persons in want of groceries, liquors, provisions, etc., can find them in large or small quantities at the store of D. S. Woodward, No. 144 J street, Sacramento.

PICTURES.—The picture gallery is completed and the artist, Rne, is now prepared to take all kinds of pictures, on short notice. See "ad."

READ UP.—Dr. H. Jackson's card, in another column, to-day.

CASSELY A FAVORITE.—The newly elected Democratic Senator, Eugene Cassely, appears to be a favorite all around. None of our Democratic exchanges seem at all displeased over his election, and the Radicals pronounce him a gentleman of ability and irreproachable character. It is amusing, however, to read what a few of the Radical sheets have to say concerning him. They put him fully on the back, and whisper in his ear: "You are just the man; your election is 'pizen' to the Chivv, though, isn't it?" Well, we reckon the "Chivv" can stand it if the Radicals can. The only man we have heard swear over Cassely's election was a Radical. When the news of his nomination reached Napa, he ripped out an oath that "another Irishman had been elected from California." Know Nothingism will crop out occasionally.—[Napa Reporter.]

The Democratic party never rewards traitors to their organization.—[Examiner.]

It might be a good thing if the Democratic party felt a little cool toward traitors to the country, too.—[Santa Cruz Times.]

Does the editor of the Times mean to invite the ill will of Democrats toward his party?

The dog-fanciers are fighting coyotes over in Nevada.

BORN.

On Willow Slough, Yolo county, January 1, the wife of Edwin Blanchard, of twins—son and daughter.

Near Cottonwood, Yolo county, December 31, the wife of B. F. Myers, of a daughter.

NOTICE is hereby given, that, in pursuance of an order of the Probate Court of the county of Yolo, State of California, made on the 24th day of December A.D. 1887, in the matter of the estate of ISRAEL SLOAN, deceased, the undersigned, Administrator of said estate, will sell at private sale to the highest bidder, for cash, in gold coin, in one parcel and subject to confirmation by the Probate Court, on

Monday, the 6th day of January, 1888,

all the right, title, interest and estate of said intestate at the time of his death, and all the right, title and interest of Yolo that said estate has by operation of law or otherwise acquired other than in addition to that of said intestate at the time of his death, in and to the following described real estate, lying and being in the county of Yolo, State aforesaid, to wit:

All that certain parcel of land, beginning at a point 4.37 chains north from the north-east corner of the south-west quarter of section seven, (7), township number nine (9), north, range number four (4) east of Mount Diablo Meridian; running thence north 89 deg. 10 min. east 34.12 chains, to the river bank; thence north 13 deg. 50 min. west 6.00 chains; thence north 24 deg. 20 min. west 13.00 chains; thence north 45 deg. west 9.00 chains; thence north 57 deg. 15 min. west 14.00 chains; thence north 60 deg. 40 min. west 11.54 chains; thence south 36.50 chains; thence north 89 deg. 10 min. east 9.87 chains, to the place of beginning—excepting therefrom thirty acres in the north-east corner of said tract sold to John Dollarhide, and ten acres of the westerly portion of said land to one Cook, more particularly described in deeds of said Dollarhide and Cook now of record in the Records of said county of Yolo, which are hereby referred to and made a part hereof for the description of said forty acres excepted from the operation of this conveyance.

Bids will be received by the undersigned, at the office of H. H. Hartley, No. 39 J street, Sacramento, up to and including the 4th day of January, 1888.

Terms and condition of sale: Ten per cent. of purchase money to be paid on acceptance of the bid, balance on confirmation of sale by the Probate Court. Deed at expense of purchaser.

H. H. HARTLEY, Attorney. d7-5w

NOTICE

IS hereby given that at the next regular meeting of the Board of Supervisors of Yolo county, on the first Monday in February, 1888, the undersigned will petition said Board for the location and establishment of certain public highways, as follows: 1st.—Commencing at the NE corner of the NW 1/4 of section 32, in township 10 north, range 2 east, Mount Diablo base and Meridian, running thence south on said 1/4 section line one mile, to the township line. 2d.—Commencing at the junction of First and Main streets, as laid down on Freeman's map of the town of Woodland, as recorded in the Recorder's office of said county; running thence due south, parallel with the first above described street one-fourth mile, to intersect with the continuation of Oak Avenue; 3d.—Commencing at the junction of Second and Main streets, as laid down on Freeman's map of the town of Woodland, as recorded in the Recorder's office of said county; running thence due south, parallel with the last mentioned proposed street, one-fourth mile, to intersect with a continuation of Oak Avenue. 4th.—Commencing at the junction of Third and Main streets, as laid down on Freeman's map of the town of Woodland, as recorded in the Recorder's office of said county; running thence due south, parallel with the last mentioned proposed street, one-fourth mile, to intersect with a continuation of Oak Avenue; all of the above to be 60 feet wide. 5th.—Commencing at the western terminus of Lincoln Avenue, as laid down on Fiske & Messenger's map of addition to the town of Woodland; running thence due west, one-fourth mile, to intersect the first herein proposed road or highway. 6th.—Commencing at the western terminus of Oak Avenue, as laid down on map of Fiske & Messenger's addition to the town of Woodland; running thence due west one-fourth of a mile, to intersect the first herein proposed road or highway. The last two streets or highways to be 80 feet wide. [d28] C. P. SPRAGUE.

NOTICE

IS hereby given that at the next regular meeting of the Board of Supervisors of Yolo county, on the first Monday in February, 1888, the undersigned will petition said Board for the location and establishment of a public highway, 60 feet in width, commencing on the township line between townships 9 north and 10 north, Mount Diablo base, at the section corner between sections 3 and 4 in township 9 north, range 2 east, and sections 33 and 34 in township 10 north, range 2 east; running thence west on said township line seven miles to the section corner between sections 4 and 5, in township 9 north, range 1 east, Mount Diablo base and meridian; thence south on the section line between said sections 4 and 5, one mile to the section corner between sections 5 and 8 in said township; thence west five miles to the section corner between sections 3, 4, 9 and 10, in township 9 north, range 1 west, to intersect with road running south from Cottonwood store. E. G. HALL, B. C. LAWSON.

Notice to Contractors.

SEALED PROPOSALS will be received by the Board of Supervisors of Yolo county, until the 14th day of January next, for the excavation of sections No. 2, 3 and 4 of a canal at or near the Sink of Putah Creek, running from a point on said creek to the tule, and within Swamp Land District No. 18. Plans and Specifications of said work can be seen at the County Clerk's office on and after the 20th inst. Said proposals will be opened at 2 o'clock, p. m., on said 14th day of January, and the work will be let to the lowest responsible bidder; and notice is further given that if said work is not let on the said 14th day of January next, proposals will be received until the first Tuesday in February next, and opened and considered at 2 o'clock p. m. on said day.

G. W. BELL, President Board of Supervisors, Yolo county. December 14th, 1887. d14-4w

Administrator's Notice.

NOTICE is hereby given to the creditors of the estate of ISAAC W. BROWNELL, deceased, to present their claims, with the necessary vouchers, to the undersigned, at Knight's Landing, Yolo county, within ten months from the date hereof, for payment, or the same will be barred by law.

ABNER BROWNELL, Adm'r of the estate of Isaac W. Brownell. By J. W. SNOWBALL, his att'y. December 7th, 1887. d7-5w

STOP THAT COUGHING.

Some of you can't, and we pity you. You have tried every remedy but the one destined, by its intrinsic merit, to supersede all similar preparations. It is not surprising you should be reluctant to try something else after the many experiments you have made of trashy compounds foisted on the public as a certain cure, but

Newell's Pulmonary Syrup

is really the very best remedy ever compounded for the cure of Coughs, Colds, Sore throat, Asthma, Whooping Cough, Bronchitis and Consumption. Thousands of persons in California and Oregon have been already benefited by the surprising curative powers of

Newell's Pulmonary Syrup.

and with one second give it their unqualified approval. We now address ourselves to all who are unacquainted with this, the greatest Panacea of the age, for the healing of all diseases of the throat and lungs, assuring you that

Newell's Pulmonary Syrup

has cured thousands and it will cure you if you try it. This invaluable medicine is pleasant to the taste, soothing, healing and strengthening in its effects, entirely free from all poisonous and deleterious drugs, and perfectly harmless under all circumstances. Certificates from many prominent citizens of San Francisco accompany every bottle of

Newell's Pulmonary Syrup.

REDINGTON & Co., Agents, San Francisco.

n32-4m

REDINGTON & CO'S

Extract of Jamaica Ginger.

This valuable preparation containing in a highly concentrated form all the properties of the Jamaica Ginger, has become one of the most popular domestic remedies for all diseases of the stomach and digestive organs.

As a tonic it will be found invaluable to all persons recovering from debility, whether produced by fever or otherwise, for whilst it imparts to the system all the glow and vigor that can be produced by wine or brandy, it is entirely free from the reactionary effects that follow the use of spirits of any kind.

It is also an excellent remedy for females who suffer from difficult menstruation, giving almost immediate relief to the spasms that so frequently accompany that period.

It gives immediate relief to Nausea, caused by riding in a railroad car, or by sea-sickness, or other causes.

It is also valuable as an external application for Gout, Neuralgia, etc.

REDINGTON & Co., sole Agents for the Pacific Coast. n32-4m

Trust no other, howe'er pleasant—None can do what this has done; Try it—always keep it present—Use the "Martha Washington."

It is used by all and is acknowledged to be superior to any other preparation in market. It keeps the hair soft and glossy. It changes the hair to its original color. It prevents the hair falling out. It prevents premature baldness. It makes old heads look young, and in fact it will do all expected of a good, genuine Hair Restorer.

Twenty thousand heads remind us What a noble treat it's stood; Millions more shall come behind us, With their tresses all renewed.

Do not be humbugged by buying any other preparation. Try it, by all means try it and you will never regret it.

N. B.—Be sure to ask for the "Martha Washington" Hair Restorer, and take no other.

REDINGTON & Co., Sole Agents, 416 and 418 Front street, San Francisco. n32-4m

Griseberg Uterine Catholicon

can faithfully used according to directions will cure every case of Diabetes, and greatly mitigate the troublesome effects caused by a relaxation of the outlet of the bladder, and for female diseases is unequalled. The Catholicon uniformly cures Erysipelas Uteri, Whites and irregularities of the monthly turn, suppression, incontinence of Urine, Bloating and dropsical Swellings, and all diseases of Pregnancy. The specific action of this medicine is immediate and certain upon the uterine and abdominal muscles and ligaments, restoring them to as healthy a state as those of childhood and youth, so that patients who have used the Griseberg Catholicon cannot sufficiently express their gratitude for the relief afforded. Redington & Co., Agents, 416 and 418 Front street, San Francisco.

Redington's Flavoring Extracts

are made from fresh fruits. Each bottle holds twice as much as any other brand in the market, consequently they are the cheapest and the best. Use no other.

REDINGTON & Co., Agents, for the Pacific Coast. n32-4m

Scovill's Blood and Liver Syrup

Nursery Rhymes.

There was a young girl of Milpitas
Who had an attack of Milpitas;
She said, "Why, I'd cough
My infernal head off,
If I stayed two more days in Milpitas."

There was an old chap of Gold Hill
Who had his foot crushed in a mill,
When he cried out, "Enough!"
And remarked, "It is rough
On an old pioneer of Gold Hill."

There was a young woman of Folsom,
Who was told that pork was unwholesome;
She said, "I shall trust
That relative's crust
Who tells me that pork is unwholesome."

There was a young girl of Grass Valley,
Who once made this humorous ally—
She said, "Go to grass!"
And when folks said "Alas!"
She remarked, "I intended Grass Valley."

There was a young girl of Sonora
Who was asked by her fondest adorer
If she'd be his wife;
She replied, "Bet your life,
That's me—count me in—ring-tail roarer!"

There was a small child at Dutch Flat,
Who played thimble-rig in his hat;
He said, "Just look here,
I'm a gambler!
That festive young child of Dutch Flat."

The editor of a country paper has been indulging in a cleaning out of some old drawers in his office, and finds the following articles which he has taken in pay for subscriptions: Bottle whooping-cough remedy, package Methodist tracts, half-dozen fish hooks, chills and fever cure, \$10,000 lottery ticket, invitation to wedding, burglar alarm, bottle essence root beer, box of heave remedy, corn plaster, package tickets "good for one glass lager," box pills, dead shot for bed bugs, box paper collars, itch remedy, complimentary to clam bake, paper carpet tacks, five valuable receipts, dozen patent clothes pins, hair restorative, package roach exterminator, order for pair suspenders, complimentary to horse trot, bottle hot drops, pass for Sunday school excursions, sleeping powders, cure for tooth-ache, bear's oil. He proposes to offer the above for sale, without reserve, of which due notice will be given.

SOME writer says: "Speech is a pump by which to raise and pour out the water from the great lake of thought, whether it flows back again." And so when you extract knowledge from a man almost against his will, instead of your pumping him he pumps himself. Query: When a man stutters, is it because the pump-box is broken?

LAW STUDENTS.—A Milwaukee orator recently remarked that there were in that city "One hundred young men studying law, who had not brains enough to wheel a wheelbarrow straight, nor common sense sufficient to know how to cross a street without getting into the deepest hole."

A LITTLE CRACKED.—A lady having accidentally broken her smelling-bottle, her husband, who was very petulant, said to her—"I declare, my dear, everything that belongs to you is more or less broken." "True," replied the lady, "even you are a little cracked!"

A LITTLE boy running along, stubbed his toe and fell on the pavement. "Never mind, my little fellow," said a bystander, "you won't feel the pain to-morrow." "Then," answered the little boy, "I won't cry to-morrow."

THE Masons have done themselves honor in recently denying to some of Brigham Young's saints a charter for a Masonic Lodge. Some of the practices common in Utah are inconsistent with Masonic ideas.

A LADY in Wisconsin plunged into a mill pond to save two boys from drowning. Her crinoline floated her, and clinging to that the boys were kept above water, and the whole party drifted safely to the shore.

WHAT can be a more desolate spectacle than an old maid sitting on an inverted half bushel, in a cold kitchen, with her feet on the brim of a slop bucket, pairing her corns with a case knife by the light of a tallow candle?

JOHN BILLINGS says if a man is going to make a business of serving the Lord, he likes to see him do it when he measures onions, as well as when he hollers hallelujah.

At a recent railway festival, the following striking sentiment was given:—"Our mothers—the only faithful tenders who never misplaced a switch."

An Irish absentee is said to have sent this comfortable message to his steward:—"Tell the tenants that no threats to shoot you will terrify me."

"I own this hand is not counterfeit," said a lover as he was toying with his sweetheart's fingers. "The best way to find out is to ring it," was the neat reply.

Ugly.—Mark Twain describes the Syrian females as so stuffily ugly that they "cannot smile after twelve o'clock Saturday night without breaking the Sabbath."

Why are women like houses? Because the longer they remain "to let" the more dilapidated and less desirable they become.

A farmer, when flagellating two of his oldest boys, was asked what he was doing? "Thrashing wild oats," was the reply.

We ascertain the qualities of a bell by ringing it. A young man had better ascertain the qualities of a belle before ringing her.

What is the difference between a barber and a mother? One has razors to shave, and the other has shavers to raise.

An old maid, speaking of marriage says it's just like any other disease—while there's life there's hope.

A SPECULATION.—The Red sea is to be drained to recover the valuables lost with Pharaoh's host.

Why is a pretty young girl like corn in a scarcity? Because she wants to be husbanded.

Why are the old maids the most charming of all people? Because they are matchless.

If you would have a good servant, take neither a kinsman nor a friend.

How do you know Pharaoh was a carpenter? Why, he made Joseph a ruler.

A LADY deserted by one man has no other remedy than to appeal to twelve.

SEMAH CLEVELAND.—Cutting off a puppy's tail to make him handsome.

Or what trade is a clergyman at a wedding? A join-her.

If you would wish the dog to follow you, feed him.

The State Legislature.
